

# GATX Environmental Policy

## APPLIES TO

This policy applies to GATX Operations at Rail North America and Rail International.

## PURPOSE

Conducting our business in an environmentally responsible manner is an important goal of operations at GATX. As a leading full-service, worldwide railcar lessor, we strive to maintain our railcars to the highest levels of safety and quality. Relatedly, we seek to reduce the environmental impact of our operations at our owned railcar maintenance facilities. In addition to working to reduce the impact of our operations on the environment, we hope to be recognized as a great corporate citizen by the communities in which we operate.

## OBJECTIVES

GATX's Environmental Health and Safety and Operations departments are responsible for maintaining compliance with the objectives stated in this Policy. In accordance with our commitment to promote sustainability and environmental awareness within the Company, we strive to:

- Understand, meet or exceed the environmental regulatory requirements of the jurisdictions in which we operate
- Maintain our railcars to the highest levels of safety and quality
- Establish practices that aim to reduce the potential for a non-permitted environmental release from our maintenance facilities and foster a timely and effective response should a release occur
- Efficiently utilize resources, including water, electricity and natural gas
- Manage operational changes to promote evaluation of the impact on the environment and the community prior to implementation and invest in programs that seek to make our operations more efficient
- Reduce waste associated with our operations and take steps to promote treatment or disposal of waste in a responsible manner
- Communicate GATX's expectations that we expect our employees to work in an environmentally responsible manner
- Leverage our continuous improvement culture and employee ideas to support our achievement of these objectives.
