

## Rail Maintenance and GATX Offices

- Reporting year 2021 Rail North America (Rail NA) data is limited to eight fixed facilities and one Locomotive Field Service location. Rail International data is limited to 2 fixed facilities. However, 2019 and 2020 reporting years include Field Service locations that are no longer owned by GATX.
- Percent consumed from the grid is the total electrical usage divided by total energy usage.
- Energy data is based on reporting locations. Energy usage for several GATX offices is based on a pro-rata share of building usage or estimated values.
- Several 2019 and 2020 percent grid consumption values have been updated to correct minor calculation errors.
